REPORT NO.**

1. Figures for 1947 on production of German firms in Thuringia (excluding Soviet AGs) were prepared by the Statistical Bureau of the Thuringian Chamber of Commerce and Industry. Part of these figures, given in a previous report, were hand-copied from the original, and some errors occurred. This report contains the figures from carbons of the official records, and any errors are therefore attributable not to the copyist but to the records themselves.
2. The figures not included in the previous report, for electrical industry, light industry, precision mechanics, building material, ceramics, stones and earths, wood products, etc., are given in Attachment B. Attachment A consists of corrections of the material from the previous report.
